## Microsystems DocXtools™ Integrates with Litéra® Corp.'s Change-Pro® for Enhanced Document Comparison

**Downers Grove, IL – September 1, 2009** - Microsystems, a leading document lifecycle solution provider for the legal and life sciences sectors, announces the integration of DocXtools™ with Litéra® Corp.'s Change-Pro® for enhanced legal document comparison.

*"The integration of DocXtools and Change-Pro provides even greater value to Microsystems and Litéra clients,"* said Deepak Massand, President, Litéra Corp. *"DocXtools comparison intervention and Change-Pro empower document authors to quickly overcome comparison issues and generate a successful document comparison."*

**DocXtools** software is a collection of document assessment, cleanup and problem-solving tools that help document authors and support teams quality control documents, simplify document collaboration and reduce document clean-up and preparation time.

DocXtools comparison intervention prepares a document (for comparison) by eliminating characters that may create inconsistent results or be incompatible with comparison engines. For Office 2007, DocXtools offers comparison rendering set preferences, which enhance a user's ability to save preferences and easily recall them. DocXtools allows a user to refine the workflow to eliminate extra steps involved in preparing and evaluating comparison documents and provides the user with the option to choose native Word, Litéra Change-Pro and other utilities to compare documents.

DocXtools is part of the Microsystems Knowledge Partnership suite of software-based solutions and expert support.

**Litéra Corp.'s Change-Pro** is a total document comparison software suite that enables document authors to compare Microsoft Word, PowerPoint and Excel files, as well as Corel WordPerfect files. Change-Pro, with its patent pending "Compound Document comparison technology" is the only product on the market that can compare embedded objects (Excel, Visio, ChemDraw, SmartDraw) and image files (jpg, png, gif, bmp, tiff and more). Litéra Corp., founded in 2001, is based in McLeansville, NC and is the technology leader in metadata removal with Metadact® (Server or Desktop) and PDF management with its cutting-edge LDF® product. For more information, visit [www.change-pro.com](http://www.change-pro.com) or call 336.375.2991.

**About Microsystems**

Founded in 1995, Microsystems is a global leader in document lifecycle software and services designed to improve the total document creation and quality control processes of document-intensive businesses. The company helps more than 650 client firms and companies increase document production efficiencies and reduce costs and risk. Microsystems is based near Chicago in Downers Grove, Illinois.
