Microsystems' Legal TemplatesPlus™ Integrates with Practice Technologies, Inc.'s Smart Rules™

Downers Grove, IL – October 1, 2009 – Microsystems, a leading document creation and quality control software provider for the legal sector, announces a strategic partnership with Practice Technologies, Inc., provider of information retrieval software and content-based systems to the legal community. The integration of Microsystems Legal TemplatesPlus™ software with Practice Technologies, Inc.'s SmartRules™ enhances legal pleading document creation.

The integration ensures that the pleadings templates in Legal TemplatesPlus contain the latest court-mandated formatting and standards, which Practice Technologies researches, gathers and provides. This results in a simplified process and a one-stop shop for Litigators to create pleadings (Legal TemplatesPlus) and access online procedural guides that provide detailed, step-by-step instructions for handling procedures for each state and federal court in the United States (SmartRules).

“Our partnership with Microsystems and the integration of Legal TemplatesPlus and SmartRules provides litigators with a superior solution to create pleading documents that adhere to the most current court rules and requirements” said Rudy DeFelice, President & CEO of Practice Technologies, Inc.

About Legal TemplatesPlus from Microsystems

[Legal TemplatesPlus](#) is a complete correspondence and pleadings solution that also includes numbering, table of contents and DocID functionality. Legal TemplatesPlus drastically simplifies document drafting, template design and maintenance. With Legal TemplatesPlus, pleadings can be produced simply and easily from the Microsoft Word 2007 Ribbon or 2003 Toolbar. Simple selections automatically bring in proper formatting and styles into the document. An easy-to-use dialog simplifies the creation process and prompts the user to enter and/or pull-in lawyer information from Access, Active Directory, Exchange, InterAction, SQL, Outlook and more. Firm configuration options are incorporated with an administration tool that addresses commonly-modified characteristics in your pleading presentation.

About SmartRules from Practice Technologies, Inc.

[SmartRules](#) is an online practice guide for the national litigator and the national litigation practice. It gives detailed, step-by-step instructions for handling procedures in state and federal courts throughout the country. A lawyer selects the court where the case is pending and the document required to file, and SmartRules provides all of the information needed to ensure the lawyer complies with all applicable rules and requirements, including all relevant local rules.

SmartRules connects to:

- State Civil Procedure Rules
- State Court Rules
- Local Rules
- Judge's Rules
- Evidentiary Code
- Federal Rules
- Civil Code

About Microsystems

Founded in 1995, Microsystems is a global leader in document lifecycle software and services designed to improve the total document creation and quality control processes of document-intensive businesses. The company helps more than 650 client firms and companies increase document production efficiencies and reduce costs and risk.
